PROJECTS

Portfolio Website

- After mastering the fundamentals of **HTML** and **CSS**, I built my own personal website, which included hyperlinks connecting it to other websites I had made.

Tic Tac Toe

- Built a classic Tic-Tac-Toe game using **Python**. Implemented a two-player mode with a graphical interface or command-line interface, allowing users to play the game interactively.

To-do List

- Developed a responsive to-do list web app using **Flask** (Python) for the backend and **HTML**, **CSS**, and **JavaScript** for the front end.

Respiratory Disease Detection Using Sound Pattern

- This project's base idea is to train a model using **Machine Learning** to find different respiratory diseases. Supervised technique is used for training the model.

Inbox Defender (Internship)

- Developed a machine learning model using TF-IDF and classifiers like Naive Bayes and Logistic Regression to classify SMS messages as spam or legitimate with high accuracy.
